The startup, based in Seattle, is the same company behind the Amazon Appstore for Android. The Amazon Appstore has sold millions of Android apps, games, and other digital content. That makes the move to Game On a natural progression, even if Game On is more focused on selling the games you

play on mobile devices. There are now more than 300 games available through the Game On store, including many original games by top studios such as Frontier and Gameloft. Those original games can be downloaded for free. "We think the marketplace for games on mobile devices is the most competitive in the world," says Arun Thakur, executive vice president of digital content at Amazon. "We wanted to bring the best games to Android users, so we created the game store
